

# OneShot™ Filling Needles

Since 1993, Overlook Industries, Inc. has been the industry-leading innovator in streamlined liquid packaging operations, overhauling lines to increase profit and reduce cleaning, prep, sterilization and validation requirements. This is accomplished by working closely with production, engineering and validation personnel to modernize your facility with the strategic employment of upgraded 316L stainless steel components and single-use liquid dispensing technology.

Overlook Industries, Inc. has been providing its customers with quality products and services for over a decade by committing to these fundamental principals:

- Design products that solve problems.
- Strive to exceed customer expectations.
- Address each customer's unique requirements.
- Commit to continually improve manufacturing methods.
- Maintain the highest ethical standards in all business practices.
- Provide our customers with the best products at a competitive price.

Overlook specializes in the design and fabrication of custom filler needles, nozzles and dispensing tips. We also design and fabricate washer needles for cleaning and sterilization units and tunnels. Our experience enables us to design products for your unique application and requirements.

Overlook can eliminate the problems associated with OEM needles by creating new needles specifically for your machinery and problem application. We consider all factors; dispense volume and speed, viscosity, solid content, proteins, lipids, etc., when designing a needle that maximizes your production.

Overlook can provide direct OEM replacement filler needles for the following brands of machinery:

- Bausch + Ströbel / Bausch Advanced Technologies
- BOC Edwards / Calumatic
- Bosch / TL
- Chase-Logeman
- Cozzoli
- Flexicon
- Groninger
- Ima
- Inova
- M&O Perry
- Mar
- Marchesini / Corima
- National Instrument

Overlook can design and manufacture filler needles for custom machines and applications.
